## PROJECTS

### ■ WANDER SF | Full Stack

[Live](#) • [GitHub](#)

Yelp for adventurers built with Ruby on Rails and React.js

- Pinpoints spot locations using Google Maps API integration
- Search bar suggestions update in real time with input text
- Custom authentication system using BCrypt to salt and hash passwords

### ■ TETRIS | Front End

[Live](#) • [GitHub](#)

Timeless class built for the browser

- Implements canvas to draw graphic elements with Javascript
- Score keeper updates and tracks score for current game

### ■ RAILS LITE | Back End

[GitHub](#)

MVC framework inspired by the functionality of Ruby on Rails

- Reconstruction of Rails functionality to show the relationship between each component
- Implements controller bases, template rendering, session storing, and params handling, all built in Ruby
